

February is Career & Technical Education Month

CTE has been a great impact on my career as a teacher. I have been given the opportunity to teach my students about the benefits of being a member of the business world. The students in my business classes are better prepared through CTE to enter the workforce, and to make better, stronger decisions about their futures. CTE classes offer real world experiences and opportunities to students that they might not receive otherwise. This past school year, I served as an advisor for the FBLA charter at my school. My students exceeded my expectations in their District and State level competitions. Ten students qualified to compete at the National level, and a team of three went on to place in the top fifteen in the nation in their particular event. I am so proud to be a part of this organization, and a member of the CTE program.”
